

Last situation: Sustainability

Q4 2022

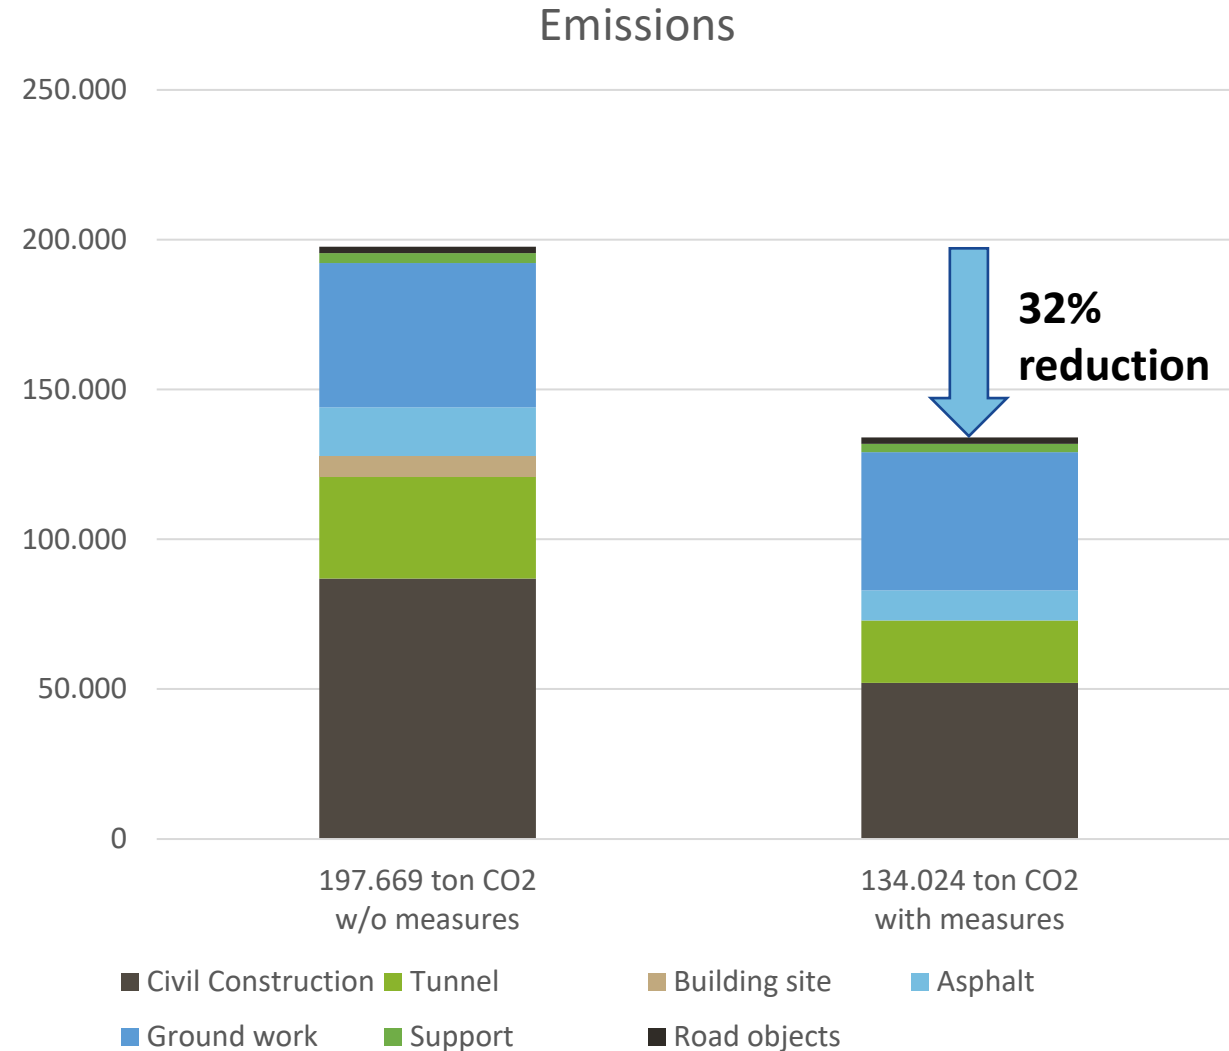

Actual CO₂ emissions

Emissions from start of work till Q4 2022
the end of construction

These are the emissions for Scope 1, 2 and
3 combined

Goal: Reducing the emissions of the
realisation phase with **23%***

*true emissions compared to the planning without
reduction measures.

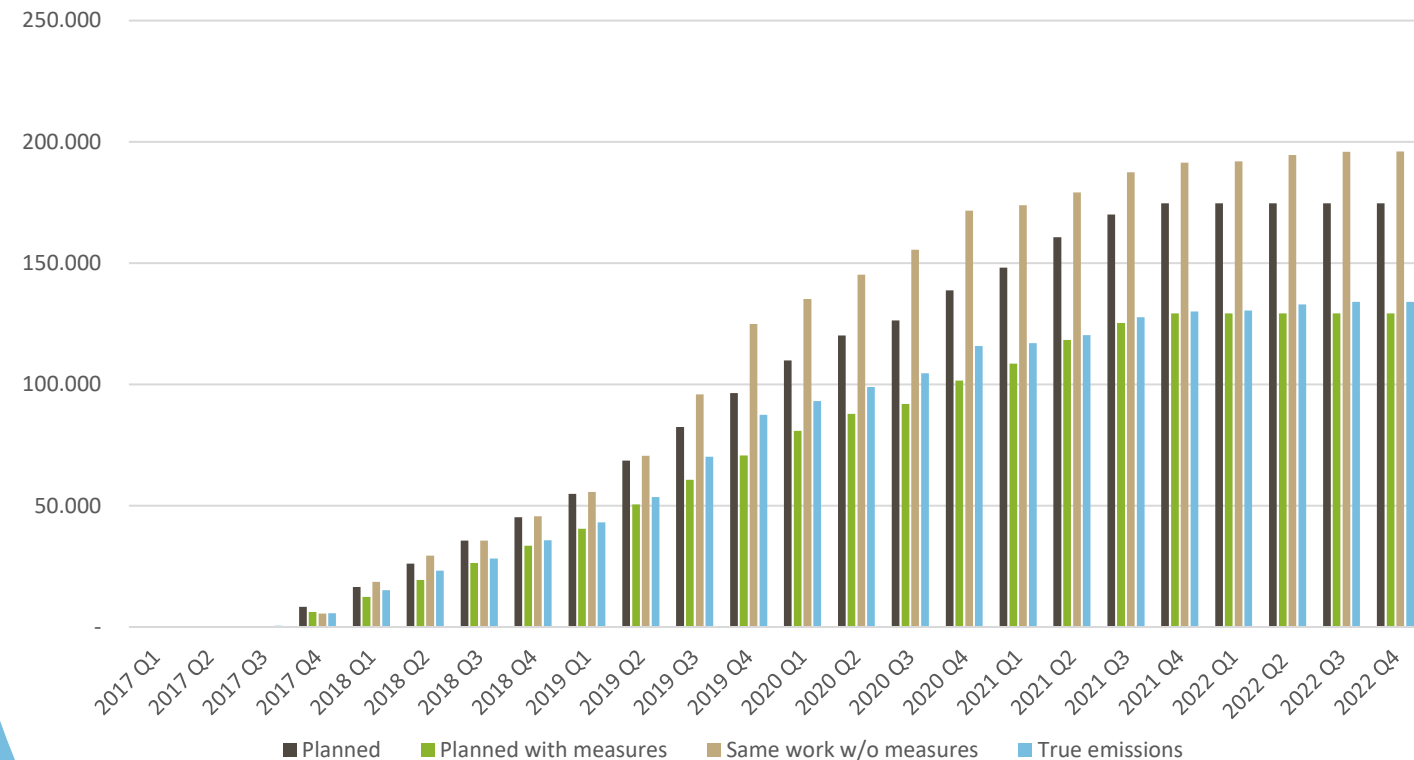

CO₂ emissions over time

Emissions from start of work till Q4 2022

Goal: Reducing the emissions of the realisation phase with **23%***

*actual emissions compared to the planning without reduction measures.

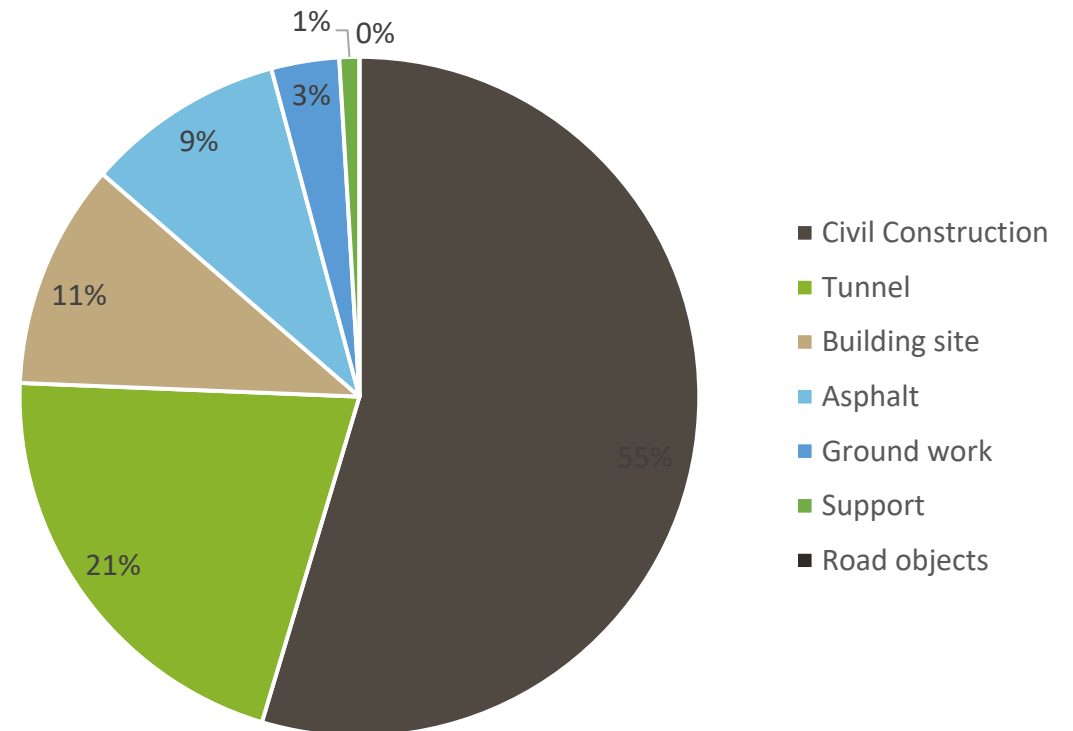

Total Emissions over time

CO₂ reduction

True emissions compared to industry standard

Reduction (total 63.645 tonnes CO₂)

Working on sustainable solutions together

We are continually looking for new sustainable measures. We try to be a soundboard for the Province Zuid Holland to continually improve our sustainability but also the sustainability of the finished product.

We are now looking into a more sustainable methods of the road and tunnel maintenance.
